## I. How to install HTS program

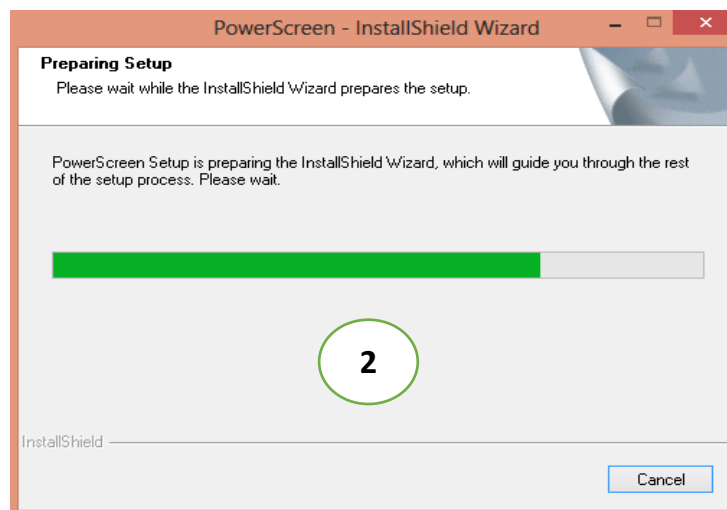

### 1. First Step

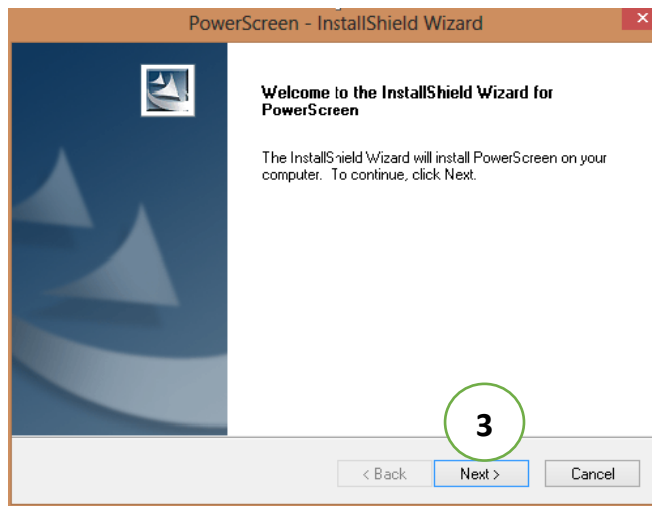

- Insert installation CD into the PC or laptop or setup file from USB.

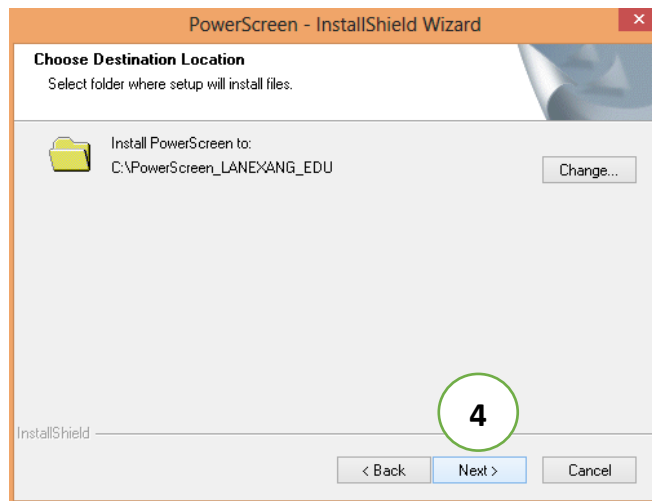

### 2. Second Step

- The setup file is running

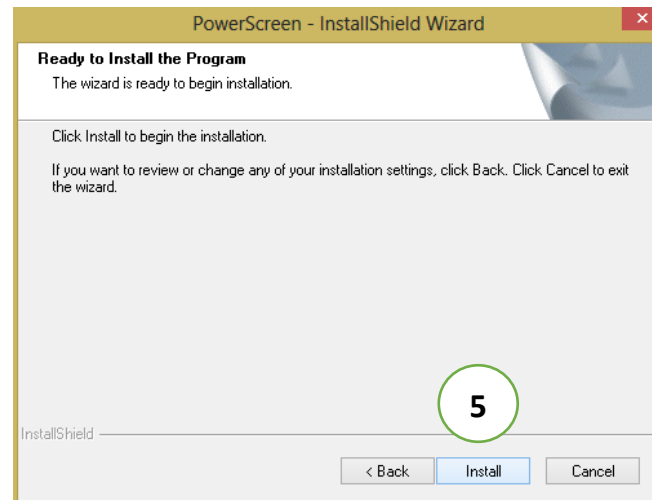

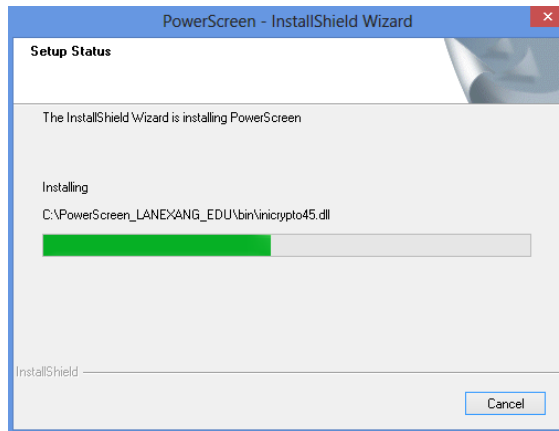

- Click > Next

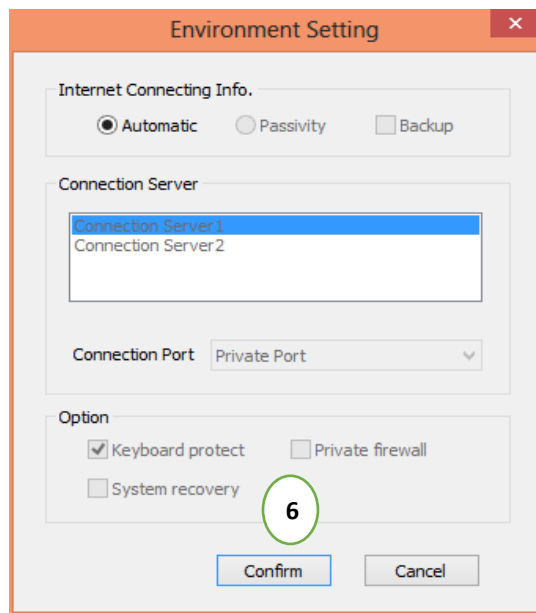

- Click > Next

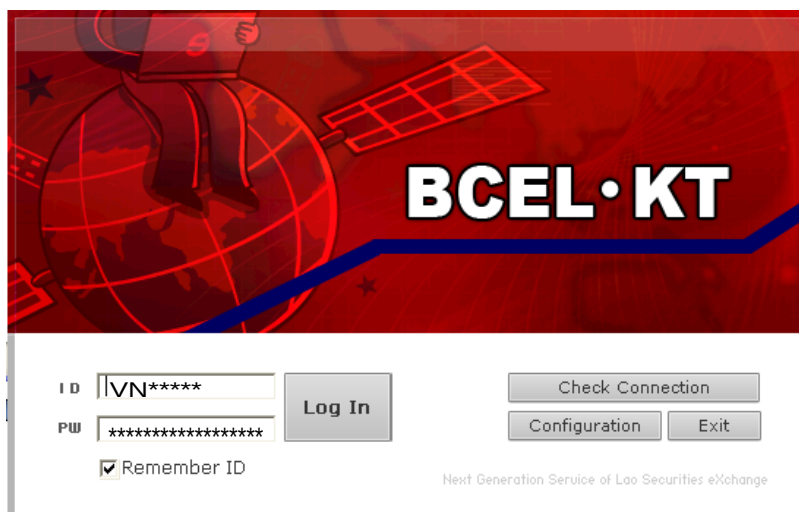

- Click > Install

- Wait to finish, after finishing it will show as the figure below:

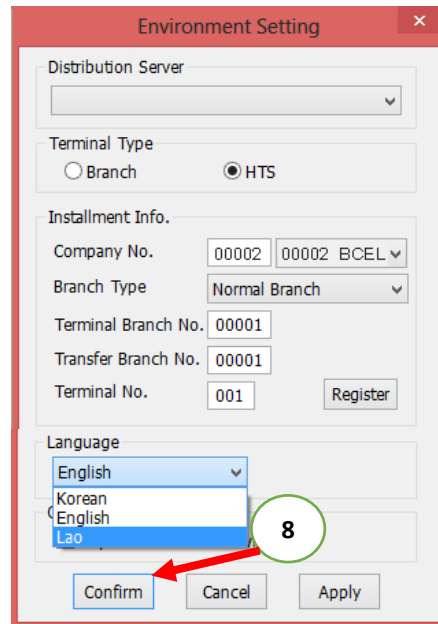

- Click > Confirm then it will show as the figure below:

### 3. Changing Language

- Click > Configuration > Language > select > Korea, English, and Lao. Then click > Confirm as the picture number 7 above, then it will show:

The screenshot shows a window titled "Environment Setting". It contains several sections: "Distribution Server" with a dropdown menu; "Terminal Type" with radio buttons for "Branch" and "HTS" (selected); "Installment Info." with fields for "Company No." (00002), "Branch Type" (Normal Branch), "Terminal Branch No." (00001), "Transfer Branch No." (00001), and "Terminal No." (001), along with a "Register" button; and a "Language" section with a dropdown menu showing "English", "Korean", "English", and "Lao". A green circle with the number "8" is placed next to the "Lao" option, and a red arrow points from it to the "Confirm" button at the bottom.

## II. How to Access Home Trading System (HTS)

### 1. Logging into the HTS Program

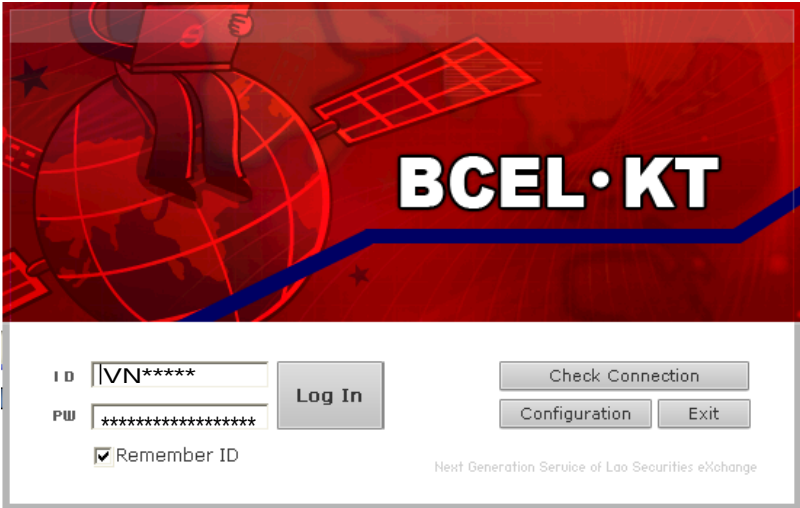

- Investors have to visit member firms to register HTS ID.
- HTS ID and password must follow by the rule of LSX, the rule is included:
  - HTS ID consists of 6-8 digits.
  - The error will occur when HTS ID is less than 6 digits and over 8 digits.
  - The HTS ID can consist of continuous number or character (Special Character do not allow).
  - The word "GUEST" cannot be used for the HTS ID.
  - The HTS ID cannot be started with "LX".
  - The password can consist of special character such as \$, !, #, \_, .....
  - The password do not allow input more than 8 digits.
- After finishing registering HTS ID, investors will receive the Account Open paper from broker as the figure below:

## Account Open

Date : 09/05/2013

|                   |                   |                   |  |
|-------------------|-------------------|-------------------|--|
| Account Number    | 010001            |                   |  |
| Customer's Name   | Test user, No.101 | Test user, No.101 |  |
| ID                | VN10001           |                   |  |
| HTS ID            | VN10001           | 1                 |  |
| HTS Password      | 2020              | 2                 |  |
| Bank Name         |                   |                   |  |
| Bank Account(LAK) |                   | Bank Account(USD) |  |
| Agent ID          |                   | Agent Name        |  |

- Password in the sheet above is automatically generated by the system, and investors can also change it after login into the HTS system by themselves.
- Use the HTS ID & password to login to the system, when input the HTS ID everytime, the 2 digits of HTS ID was automatically encrypted by the system as shown the figure below:

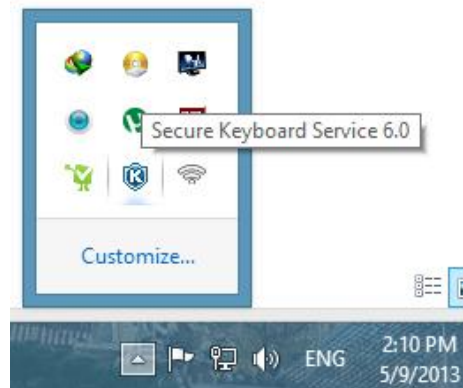

The image shows a login interface for BCEL-KT. The header features a red background with a globe and a satellite, and the text "BCEL-KT" in large white letters. Below the header, there is a login form with the following elements:

- ID**: A text box containing "VN\*\*\*\*\*".
- PW**: A text box containing "\*\*\*\*\*".
- Remember ID**: A checked checkbox.
- Log In**: A button.
- Check Connection**: A button.
- Configuration**: A button.
- Exit**: A button.

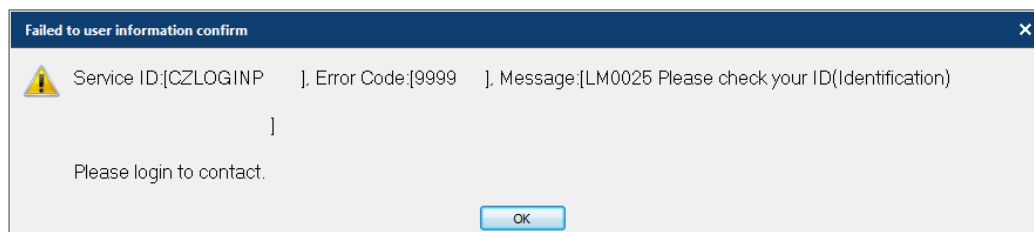

At the bottom right, there is a small text: "Next Generation Service of Lao Securities eXchange".

- After key-in the HTS ID and password you will see the secure keyboard service running automatically at the bottom of the taskbar, see the picture below:

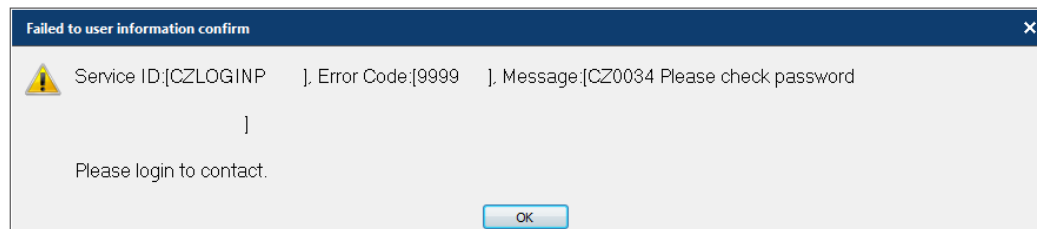

## 2. Input Incorrect HTS ID & Password More Than 5 Times

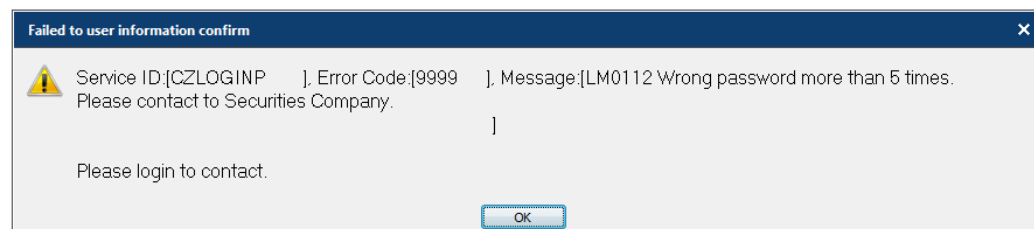

- In case of input HTS ID mistake it will show message box as below:

- In case of input HTS password incorrect it will show the message box as below:
